Why Change?

Continuously improving quality world class commissioning for primary care

World class commissioning: Estates and Infrastructure

Leading local change

Context

- Increased focus on quality and productivity
- Review of current GMS Directions
- Innovation
- Continued drive for primary care and community services

Where are you and where are you going?

- 1 Mapping the baseline
- 2 Developing the vision
- 3 Making it happen

How are you going to get there?

- A clear and managed approach
- Information for current and future providers
- Board level commitment & leadership
- Promoting patient choice
- Developing the market
- Estate management – capacity & capability
- Engagement – clinical, patient & public

World class commissioning

- *Mapping the Baseline*

- Existing infrastructure
 - Potential to improve
 - Current and potential providers
 - Understand communities and behaviours
-

Developing the Vision

– *Analyse Future Needs*

- Services
 - Populations
 - Integration & alignment
 - Choice & accessibility
 - What is the patient offer
 - What is the strategic service configuration
-

Developing the Vision

– *Create an Estates Strategy*

- Understand current Estate (and infrastructure)
- Use combination of inputs to come up with short, medium and long term future commissioning needs analysis
- Map needs onto current and future Estate plans
- From combination of above, formulate short, medium and long term analysis and actions
-

Making it Happen

– *Create an informed Estates Strategy*

- A clear and managed approach
- Information for current and future providers
- Board level commitment & leadership
- Promoting patient choice
- Developing the market
- Estate management – capacity & capability
- Engagement – clinical, patients & public

Making it Happen

– *Leadership*

WCC c1

- Work is not optional – WCC demands it
 - Drive for better integration & alignment of services
 - Drive for quality & productivity
 - Local clinical leadership is key
 - Clarity over ownership & control
 - Evaluation of medium & long term options
-

Making it Happen

– *Developing the market*

- Work with key stakeholders
- Ensure capacity, capability & confidence
- Produce a clear estate strategy – that links to Health strategy
- Be clear about your approach to market testing
- Develop innovation
- Consider non premises solutions

High Quality Care For All
